

Individual Quiz – Module 15:

Name: _____

What is the output of the following program:

```
print( '{0:4.2f} {0:8.6f}'.format(2.786549392) )
```

- (A) 2.79 2.786549
- (B) An error is created because there are two curly brackets in the blueprint and only one argument to format.
- (C) 2.78 2.786549
- (D) 2.786549392 2.786549392
