Individual Quiz: More on Functions

Name: _____

The following is a simple function definition:

```
def function(a, b):
    return a+2*b
```

Mark the true statement:

1.   Invocation `function(a=1, b=2)` returns 5 and `function(b=1, a=2)` returns 4.

2.   Invocation `function(a=1, b=2)` returns 4 and `function(b=1, a=2)` returns 4

3.   Invocation `function(a=1, b=2)` returns 5 and `function(b=1, a=2)` returns 5

4.   Invocation `function(a=1, b=2)` returns 4 and `function(b=1, a=2)` returns 5

5.   Invocation `function(a=1, b=2)` returns 6 and `function(b=1, a=2)` returns 0

6.   Invocation `function(a=1, b=2)` and `function(b=1, a=2)` cause an exception.
