Selftest: Dictionaries

1. Write a dictionary that associates the following keys to the following values:

1	"eins"
2	"drei"
3	"zwei"
4	"vier"
5	"fuenf"

   A. Write a function that prints out the dictionary in the form   Key: value.
   B. Now change the dictionary value for 2 to "zwei" and for 3 to "drei" (as it should be).
   C. Add the value "neun" to the key 9 in the dictionary.
   D. Write a program that prints out all numbers between 1 and 10 (inclusive) and also True or False according to whether the number is a value in the dictionary.
